Wine Connoisseur, Chess, Fitness & Health, Business & Economics, Cryptocurrency Technologies, World Culture, Plant Dad, Meditation

📁 EXPERIENCE

Lead Front End Developer,

ERS/DRS Software, Fullsteam 📍

01/2023 – present | Cedar Park, TX

- Developed and launched innovative e-commerce features, including the "You Might Also Like" section and the "Bundle Builder," enhancing the user interface for store owners and driving a 25% increase in conversion rates.
- Led the development and launch of a new website template, pioneering entry into a new business vertical, which contributed to a 15% growth in market share and annual revenue.
- Fostered a collaborative environment across a cross-functional team of developers, designers, tech support, and QA engineers, ensuring high-quality support and significantly improving client satisfaction and brand loyalty.
- Applied expertise in PHP, JavaScript, Node.js, and Astro to modernize legacy code and contributed to the development of a new Proxy API and reverse proxy solution using NGINX, streamlining operations and enhancing system efficiency.

Junior Developer, *Lumenbrite* 📍

07/2022 – 01/2023 | Austin, TX

- Revitalized over 10 professional websites, enhancing aesthetic appeal and functionality using React, Node.js, Bootstrap, and integrating graphic design assets from designers, thereby boosting user experience and engagement.
- Played a pivotal role in troubleshooting and resolving complex technical issues, restoring and improving client confidence, and demonstrating excellent problem-solving abilities.
- Implemented effective SEO strategies across client websites, leading to an average threefold increase in search authority and Google rankings.

📁 PROJECTS

Golf Tee Time Scheduler,

Python, Selenium, Vanilla JS, Digital Ocean

I built a web crawler bot to sign in to my client's golf club profile and automatically book a tee time for him so he doesn't have to do it manually every week. A cron job runs the script twice a week in the mornings to navigate through the website and book the first available time slot.

Bundle Builder App,

Svelte, Astro, NoSQL, JavaScript

This application enables e-commerce store owners to craft item bundles by dragging and dropping inventory items, creating a visually cohesive scene on the product page. This feature facilitates a network of item links, enhancing user engagement.
